Venue: Theivanai Ammal College for Women, Villupuram

8 Credit hours awarded by

The Tamil Nadu Nurses and Midwives Council, Chennai

DEAR COLLEAGUES

Greetings from E.S.College of Nursing. The management, Principal, Faculty and Students of college of nursing have great pleasure inviting you to the 3rd National conference on "INFECTIOUS DISEASES: PUBLIC HEALTH CHALLENGES" which will be held on 6th January 2018.

ABOUT US

E.S.College of Nursing was established in the year 2008 and this has been started to prepare the nurses as a professional nurse to provide quality care under evidence based nursing practice with the motto of Strive-Serve-Shine. It is approved by the government of Tamilnadu recognized by Indian nursing council, New Delhi, The Tamilnadu Nurses and Midwives Council, Chennai, and affiliated to the Tamilnadu Dr.M.G.R.Medical University, Chennai.

ABOUT THE CONFERENCE

The emergence of life-threatening infections highlights the urgent need for efficient infection control practices in health care. Failure to apply infection control measures favors the spread of pathogens, and health-care settings can act as amplifiers of disease during outbreaks, with an impact on both hospital and community health. If outbreaks hit health care settings without a culture of safe practices, the risk of disruption to health care system can be high. A rapid response to infectious threats of public health concern requires early warning. Health-care settings are in the front-line of containment and response strategies and the hospital-based and public health surveillance systems must be formally and efficiently linked to assure such early notice. A huge gap still exists between the knowledge accumulated over the past decades and implementation of infection control practices. This gap is even deeper in poor-resource settings with devastating consequences. Breaches in infection control measures undermine every advance and investment in health care. Keeping this in view ESCON is organizing National conference on "INFECTIOUS DISEASES: PUBLIC HEALTH CHALLENGES" that would serve as a base for nurses and other professional to have better understanding on infectious diseases and develop a desirable attitude and skill to provide holistic care

AIMS OF THE CONFERENCE:

At the end of this National conference, Participants will be able to

1. Understand the overview and magnitude of emerging infectious disease
2. Enumerate the current top priority of infectious diseases
3. Appreciate the early detection and surveillance of emerging infectious disease
4. Recognize the Vulnerabilities and contributing factors of Emerging infectious diseases
5. Analyze the Social and economic impact of infectious diseases
6. Update the Legal and Ethical aspects of Infection control in public health
7. Assess the challenges of infectious disease and finding solutions
8. Apply the nursing responsibilities towards control of Emerging infectious diseases
